

TOWNIES

Synopsis

Since witnessing her sister's gruesome, accidental death years ago, Roann Riley has been determined to escape her past. She is relieved to be beginning her Senior year at a local University.

Roann's plans change when she falls for Logan, a young writer from Chicago, while he is researching small town folklore on her college campus. Roann's relationship with Logan quickly becomes serious. Her friends are surprised when she decides to move from Fort Wayne to a tiny suburb called Rosebrook - a decision prompted by Logan's desire to share an inexpensive and spacious rental property outside in the very town he is researching.

Everything seems perfect when Roann and Logan move in together. Rosebrook is charming. However, Roann starts to doubt her decision when things begin to change. After a few weeks, she starts to notice oddities in the locals - "creepy townies," as her friend Andrew calls them. Roann tries to laugh off the notion that something isn't right until haunting visions and Logan's startling research lead her to uncover a buried secret: the murder of a local woman, a tight knit community willing to do almost anything to protect its way of life, and the realization that she will have to confront the horrors of her past.
